

Year 6

	<u>Geography</u>	<u>History</u>	<u>Art</u>	<u>DT</u>	<u>Music</u>	<u>Science</u>
 <p><b>Autumn</b></p> <p><b>Why was the Titanic called 'The Ship of Dreams'?</b></p>	<p><b>River study</b></p> <p><b>3a i</b> Describe and understand key aspects of physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle.</p> <p><b>3a ii</b> Describe and understand key aspects of human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water.</p> <p><b>4a</b> Use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied.</p> <p><b>4b</b> Use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world.</p> <p><b>4c</b> Use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.</p>	<p><b>Titanic</b></p> <p><b>5</b> <b>A local history study.</b></p> <p>Examples (Non-Statutory) * A study over time tracing how several aspects of national history are reflected in the locality (this can go beyond 1066). * A study of an aspect of history or a site dating from a period beyond 1066 that is significant in the locality.</p>	<p><b>1a</b> Create sketch books to record their observations and use them to review and revisit ideas.</p> <p><b>1b</b> Improve their mastery of art and design techniques, including drawing, painting and sculpture with a range of materials [for example, pencil, charcoal, paint, clay].</p> <p><b>1c</b> Know of great artists, architects and designers in history.</p>	<p><b>1a</b> Use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups.</p> <p><b>1b</b> Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design.</p> <p><b>2a</b> Select from and use a wider range of tools and equipment to perform practical tasks [for example, cutting, shaping, joining and finishing], accurately.</p> <p><b>2b</b> Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities</p> <p><b>3a</b> Investigate and analyse a range of existing products.</p> <p><b>3b</b> Evaluate their ideas and products against their own design criteria and consider the views of others to improve their work.</p> <p><b>3c</b> Understand how key events and individuals in design and technology have helped shape the</p>	<p><b>1a</b> Play and perform in solo and ensemble contexts, using their voices and playing musical instruments with increasing accuracy, fluency, control and expression.</p> <p><b>1b</b> Improvise and compose music for a range of purposes using the inter-related dimensions of music.</p> <p><b>1c</b> Listen with attention to detail and recall sounds with increasing aural memory.</p> <p><b>1d</b> Use and understand staff and other musical notations.</p> <p><b>1e</b> Appreciate and understand a wide range of high-quality live and recorded music drawn from different traditions and from great composers and musicians.</p> <p><b>1f</b> Develop an understanding of the history of music.</p>	<p><b>6. Electricity</b></p> <p><b>6a</b> Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit.</p> <p><b>6b</b> Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches.</p> <p><b>6c</b> Use recognised symbols when representing a simple circuit in a diagram.</p> <p><b>5. Light</b></p> <p><b>5a</b> Recognise that light appears to travel in straight lines.</p> <p><b>5b</b> Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye.</p> <p><b>5c</b> Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.</p> <p><b>5d</b> Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.</p> <p><b>1. Working Scientifically</b></p>

world

**4a**  
Apply their understanding of how to strengthen, stiffen and reinforce more complex structures.

**4b**  
Understand and use mechanical systems in their products [for example, gears, pulleys, cams, levers and linkages].

**4c**  
Understand and use electrical systems in their products [for example, series circuits incorporating switches, bulbs, buzzers and motors].

**4d**  
Apply their understanding of computing to program, monitor and control their products.

**5a**  
Understand and apply the principles of a healthy and varied diet.

**5b**  
Prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques.

**5c**  
Understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed.

During years 5 and 6, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:

**1a**  
planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary.

**1b**  
Taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate.

**1c**  
Recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs.

**1d**  
Using test results to make predictions to set up further comparative and fair tests.

**1e**  
Reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations.

**1f**  
Identifying scientific evidence that has been used to support or refute ideas or arguments.
